Subject: Bridge Advertisement (DSI 23-15) Bolt Tightening Clearances for Field Splices
Date: Monday, May 1, 2023 1:38:24 PM

The [EPG](#) has been updated as described below:

Implementation Statement: Effective immediately for all jobs even if submitted to Design or under contract.

(The Implementation Statement is a recommendation by the Development Section. The SPM is responsible for the level of implementation for any particular job.)

Revision Date	Items Revised	Description of Change
May 2023	EPG: 751.14.3	EPG guidance has been modified to ensure that bolt tightening clearances are checked for bolted field splice designs. Previous language was geared towards using the standard splice tables and did not account for independent designs. Recently several projects have been submitted where it appears the assembly clearances were not checked.
