Tool and Equipment Challenge Application Form

Have you or your work group made a tool or modified a piece of equipment to get work done better, faster or cheaper? Why not let everyone share in the success? Fill out the form below. Your best practice may even qualify for an award and be used throughout the state. Most of all, thanks for helping make MoDOT the best it can be.

1) Describe your best practice. (Attach photos, videos and diagrams if available.)

David Herbst came up with the idea to mount casters on the rear of the concrete saw to make it easier and less straining to turn the saw around on different cuts.

2) How does MoDOT benefit from this best practice? (Check all that apply.)

- Saves money
- Saves time
- Simplifies work
- Improves safety

4037 org

Describe how: By adding the casters it now makes it easier to turn the saw on different cuts, which before there many times it took 2 employees to move the saw a different direction. The casters make the saw where you can swivel the saw with ease without lifting the rear of the saw up off the ground and straining on the back.

3) When was your best practice implemented?

[Empty box for date]

4) How much does your tool or equipment modification cost? (Please attach a complete materials list.)

Total labor hours: 5 hrs Total material costs: \$0 40.00

5) Contact information: Name

Donald Edgar

Telephone

573-518-1555

District/Location

10/Park Hills

Please save and send your completed form and any attachments to your district challenge coordinator. Or sign and mail your completed form through department mail.
