About the OnDemand Course Bundle

This OnDemand Course Bundle was created to help you study at your own pace, but also choose the course time frame that works best for you. We leverage over 45 years of PE exam prep experience when designing our OnDemand courses, offering you a thorough review of every NCEES PE Civil Transportation exam topic. Our professional engineers have real-world experience and will guide you through each step of your exam prep. Choose between the 3-month, 6-month, or 1-year options. Our course has been completely updated to prepare you for the closed-book PE Civil CBT exam.

Your PPI OnDemand course comes with:

- Brand new content for the CBT exam.** Our PE Civil prep courses are brand new and fully prepare you to pass the PE Civil CBT closed-book exam.
- Instruction from professional engineers.** Includes 70+ hours of recorded lectures, problem-solving demonstrations, and exam strategy sessions.
- Trusted exam prep materials designed to help you pass.** You'll receive reference materials, homework assignments, detailed class notes, and access to PPI's Learning Hub.
- PPI's Learning Hub** with a study plan, practice exams, quiz generator, and so much more!

OnDemand Course: PE Civil Transportation - 3 Months Access \$1,780.75 [Add to Cart](#)

Description and Benefit

We created a new opportunity to get our Engineers excited about passing the Fundamentals of Engineering exam to receive their Engineering in Training Certification (EIT) as well as passing the Principles and Practice of Engineering exam to become a licensed Professional Engineer. This program was specifically designed and developed to assist our engineers in preparing for these exams to get their EIT and PE. We held eight, one-and-a-half-hour study sessions to help our employees become more prepared for the exams. The sessions were led by MoDOT engineers who have already obtained their PE. These engineers are from different departments and have a wide variety of experience. The sessions started with an introduction and explanation of the benefits of the classes and the licensure. The following seven sessions were focused on working problems from a practice exam in an open team environment so everyone could learn together. It was a great benefit to allow our employees to spend time studying for these exams in work hours and encouraging them to further their careers. It gave them a better understanding of what preparing and taking these exams would look like and how passing these exams could benefit their career.
