Operations and Maintenance Summary	150

MESSAGE FROM THE DIRECTOR

The citizens of Missouri own a tremendous asset – the state transportation system. A significant component of the state system is the 33,832 miles of roads and 10,397 bridges, both of which rank among the largest for any state in the nation. On average, Missouri drivers pay \$30 per month in fuel taxes and fees to fund the maintenance and improvements to this asset. Over the last 10 years, Missourians have invested in 4,333 projects totaling \$10.9 billion to maintain and improve the system. Looking forward, \$5.5 billion is estimated to be available for projects over the next five years for additional improvements.

Since transportation needs greatly outweigh funding available, the challenge is determining the optimal projects to fund that provide the greatest return on investment to taxpayers. Across every region of the state, feedback from Missourians has consistently prioritized maintaining the existing system as the highest priority. Other priorities include projects that improve safety and reliability, spur economic growth and provide more transportation choices.

With the priority of maintaining the existing system, MoDOT has developed asset management plans for each district with the goal to maintain current pavement and bridge conditions. The asset management plans focus on preventive maintenance improvements to keep good roads and bridges in good condition. Research shows preventive maintenance solutions, such as cyclical overlays on roads in good condition, are the most cost-effective approach to taking care of road and bridge assets. If preventive maintenance investments were not made, the cost of improving the asset in poor condition can cost four to ten times more.

In 2019, the Missouri General Assembly passed Gov. Mike Parson's FOCUS ON BRIDGES program in two phases. The first authorized \$50 million in general revenue to expedite the repair and replacement of 45 bridges that had already been identified as some of the state's top bridge priorities by local planning organizations. The second authorized \$301 million in bonding – to be repaid over seven years from general revenue – to repair or replace another 215 bridges that had been previously prioritized, contingent on Missouri receiving a federal INFRA Grant to replace the I-70 Missouri River Bridge at Rocheport. Missouri received an \$81.2 million INFRA Grant in July 2019, which triggered the first of two bond sales which occurred in November 2019. During 2020, 101 Focus on Bridges projects were completed and many more will be completed in 2021.

“MoDOT continues to invest taxpayer money wisely. Over the last 10 years, MoDOT has delivered 4,333 projects worth \$10.9 billion. These projects were completed 7.5% under budget and 94% on time.”

MESSAGE FROM THE DIRECTOR

Additionally, in 2019, the General Assembly passed a transportation cost-share program, also a priority of Gov. Parson, which made \$50 million available for local community transportation priorities. In January 2020, the Missouri Highways and Transportation Commission approved the award of 19 projects totaling \$47.9 million under the program. In April 2020, the MHTC approved one additional project and the remaining \$2.1 million in available funds. Due to the funding uncertainty associated with the COVID-19 pandemic, notice to proceed on approximately \$46 million of the initial \$50 million had been deferred until after July 1, 2020. Funding for those projects was restored in January 2021 as a result of redirected federal CARES Act monies.

Missouri also received a federal Competitive Highway Bridge Program grant in 2019 for the Fixing Access to Rural Missouri (FARM) Bridge Program totaling \$20.8 million. This program will help fund the replacement of bridges in the northern half of the state that are currently in poor condition, weight restricted, supported by timber pile and are one lane but carry two-way traffic. A design-build team to deliver the project is expected to be selected by the Commission in May 2021.

The Program was developed assuming a federal funding level consistent with the last year of the FAST Act and includes the federal surface transportation funding provided by the Coronavirus Response and Relief Supplemental Appropriations Act (CRRSAA), which was enacted on December 27, 2020. Other funding assumptions include redirected CARES Act monies and bond issuances in 2023 and 2026 to be repaid with dedicated motor vehicle sales tax revenue which is deposited in the State Road Bond Fund per the Amendment 3 legislation.

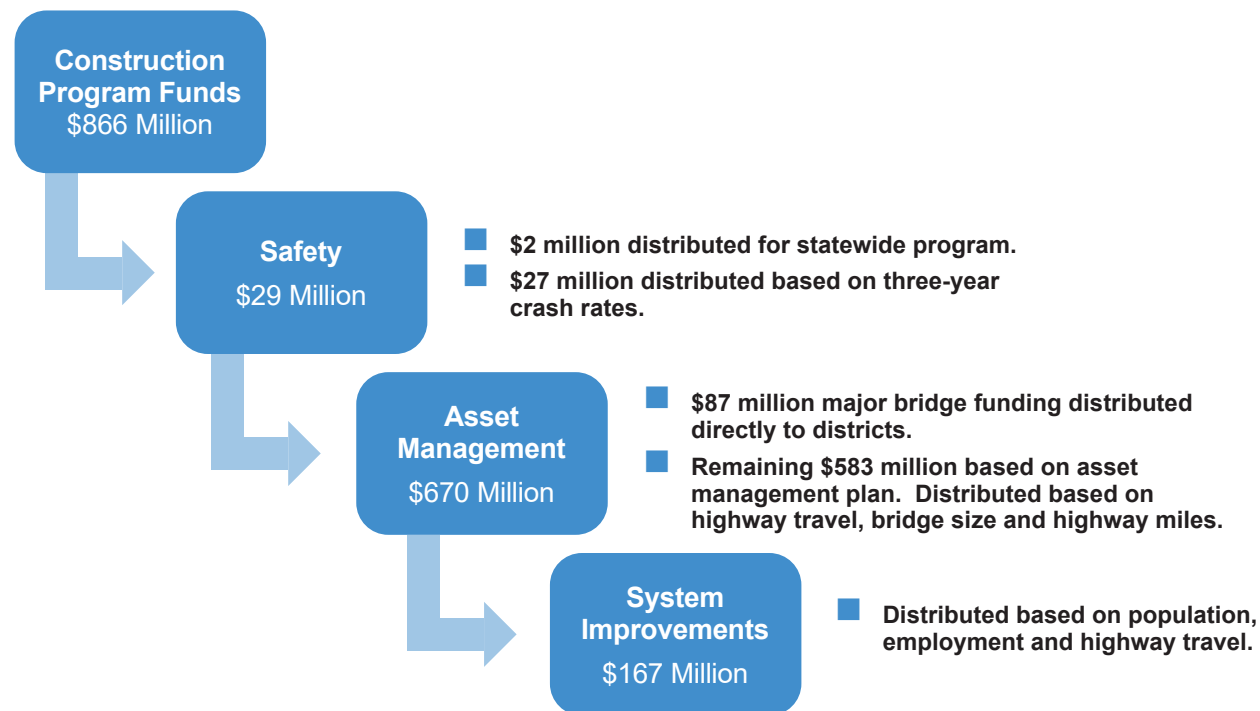

The projects in the Program deliver what taxpayers have asked for – take care of the existing system. While \$5.5 billion of available funding represents a significant investment, many regions will only have adequate funding to maintain current pavement and bridge conditions. While maintaining the status quo is not what Missourians desire, it is not prudent for the state to expand the transportation system in regions that struggle to take care of the existing system.

Each MoDOT district receives funding to invest in Missouri's transportation system. Since 2003, the Missouri Highways and Transportation Commission has used a formula to distribute construction program funds for road and bridge improvements to each of its districts. The formula provides funding for safety improvements, asset management and system improvements.

Financial and Regional Planning Process Summary

The majority of funding for state roads and bridges comes from state and federal fuel taxes. Other funding sources include vehicle sales taxes, vehicle and driver licensing fees, interest earned on invested funds and other miscellaneous collections.

These funds are available for MoDOT's operating and construction program budgets. MoDOT's operating budget includes staff and expenses for maintenance, fleet, facilities, information systems and administrative activities. The remaining funds are available for the Program, which is the largest area of MoDOT's budget. STIP funds are allocated annually to districts using the following formula (based on 2022 categories and amounts):

Once construction program funds are distributed to districts, MoDOT collaborates with regional planning groups to identify local priorities based on projected available funding. The regional transportation improvement plans are brought together to form MoDOT's Program. There are two types of regional planning groups in the state: urban areas have Metropolitan Planning Organizations, and rural areas have Regional Planning Commissions. Board members for each of these groups are typically city and county leadership, elected officials and local business owners.

The regional planning groups reach out to local citizens to identify transportation needs. MoDOT staff assists regions to prioritize those needs based on road and bridge conditions, traffic safety data and overall mobility. The prioritization process also includes balancing priorities with available funds.

Reference Information

Asset Management	A strategic practice focused on using limited resources for the preservation, operation and management of the state's transportation infrastructure.
Capital Improvement Project	A transportation improvement that substantially increases the capacity of the transportation system, such as new travel lanes, interchanges or bridges.
FAST Act	The Fixing America's Surface Transportation (FAST) Act is a funding and authorization bill to govern United States federal surface transportation spending.
Fiscal Year	This is the 12-month period to which the annual Program budget applies. The State of Missouri fiscal year is July 1 through June 30. The Program fiscal year is July 1 through June 30.
Focus on Bridges	A program to repair or replace several of the state's worst bridges. Projects are noted with a "FOCUS ON BRIDGES" watermark.
Inflation	Three percent project growth factor compounded annually is applied to right-of-way and construction in programs years 2, 3, 4, and 5.
Lane Miles	Represents the centerline length multiplied by the number of lanes on pavement improvement projects.
Length	Represents the calculated centerline distance on a project based on the primary direction of each route.
Payment Projects	A transportation improvement project administered by a partnering agency. The funding represents MoDOT's state and federal resources allocated to the project.
Est. Total Cost	Represents the planning estimates of the total costs of the project. These include: preliminary engineering, right-of-way, utilities, construction and construction engineering.
CARES Act	The Coronavirus, Aid, Relief, and Economic Security (CARES) Act provides economic stimulus to Americans in response to the economic fallout of the Coronavirus (COVID-19) pandemic.
FARM Bridge Program	Fixing Access to Rural Missouri (FARM) Bridge Program is Missouri's program to utilize the Competitive Highway Bridge Program grant awarded in 2019 by the Federal Highway Administration.
CRRSAA	The Coronavirus Response and Relief Supplemental Appropriations Act was signed into law on December 27, 2020, to help mitigate the financial impact of the COVID-19 pandemic.

Operations and Maintenance Summary

Calendar Year 2021 - 2023

The information contained on the following pages shows planned work as well as routine maintenance work for the next three calendar years. The planned maintenance work is programmed at 80% the first year, 60% the second year and 40% the third year. The routine maintenance work is a projection of responsive work for the next three years, based on historic data.

	<u>Northwest</u>	<u>Northeast</u>	<u>Kansas City</u>	<u>Central</u>	<u>St. Louis</u>	<u>Southwest</u>	<u>Southeast</u>	<u>Central Office</u>	<u>Total (\$1,000)</u>
2021
