MoDOT's Cleanup Script

Included in our MoDOT's workspace is our PowerGeopak Cleanup Script. This script restores PowerGeopak back to the factory defaults and pushes our customized settings to the local machine. The script is designed for **PowerGeopak SS4** for either a 32 or 64 bit machines and is ran after the initial installation of PowerGeopak or after issues arise with the software.

The script is located at the following location:

C:\MoDOT_Workspace\Cleanup\Restore_PowerGeopak_Defaults.cmd

Below is the list of customized MoDOT settings files that are pushed to the local machine when the script is ran:

ACCUDRAWFAV.XML
ACCUDRAWSETTINGS.XML

MODOT-POWERGEOPAK-MODOT.UPF
